centent of which can be readily extracted, and at least one commercial organization has been formed to exploit this course of supply. Only such natural deposits as are found in the Siassfurt mine, in Germany, however, would be adequate to fill the great and growing demand. And such deposits have at last been found in the United

States.

The efforts of the geological survey were rewarded soon after the war began by the discovery of a deposit of potasi, estimated at 10,000,000 tons, at Scarlos lake in Death Valley, Calif. According to an announcement by Franklin K. Lane, secretary of the interior, the mining of this potash is about to be begun at the rate of 120 tons a day, or 37,440 tons a year, This rate of production is expected to be increased rapidly. The imports from Germany for several years have been at the rate of 200,000 tons annually.

REAL "DEAD MAN'S CHEST."

(Manchester, Eng., Guardian.) The rendering of the first line of Stevenson's immortal song as "Fifteen men on a dead man's chest" spoils the significance of the phrase, writes a correspondent. License is permitted to poets, but no fifteen men could ever find room on the chest of any man, dead or alive, unless they were Lilloutians on the tops of a Guiliver. The actual phrase is "the Dead Man's salt, K Chaking powder, shortening and Chest," which is the name of one of milk, and roll into a sheet half an inch the Virgin islands, lying to the east thick, having the ends even.
